Quick Start Tutorial for Oracle IoT Fleet Monitoring Cloud Service

Before You Begin V

Purpose /

This quick start tutorial shows you how to configure Oracle Internet of Things (IoT) Fleet Monitoring Cloud Service for your company. It also shows you how to examine your fleet's real-time performance data to improve your fleet's utilization and reduce operations cost.

Time to Complete

Approximately 30 minutes

Background

The Oracle IoT Fleet Monitoring Cloud Service application uses sensor data from Oracle IoT Cloud Service to enable a fleet manager of a company to:

- Retrieve the real-time status of vehicles and drivers
- Perform preventive maintenance of the fleet
- Configure Geofencing around its facilities and those of its customers
- Generate reports based on desired granularity and contextual information needed

Scenario V

ChocoTime Inc., a member of Word Cocoa Foundation is one of the largest manufacturers of high-quality chocolate balls in North America. The company has a wide distribution network to to reach out to its vast customer segment. This includes 3 mega distribution centers and multiple warehouses located strategically across US and Canada. In each of these locations the company owns and operates a network of vending machines for direct retail to consumers.

Oracle Transportation Management or Oracle Transportation Management Cloud Service

The company currently operates around 300 trailers. To optimize the distribution network and to support its operations ChocoTime, Inc. leverages Oracle Supply Chain -Transportation Management for: No product with this name.

- Packaging and consolidation
- Load configuration and route planning
- Delivery and pickup optimization
- Carrier, equipment and location capacity

 Driver and supplier payment The head of operations for ChocoTime, Inc. identified several challenges that led to late shipments and supply chain problems due to lack of:

- real-time visibility
- predictive maintenance
- geofencing
- driver profiling

He chose Oracle IoT Fleet Monitoring Cloud Service to address the issues in his fleet. ChocoTime Inc. completed an upgrade to its entire fleet of over 300 trailers by connecting them with On Board Diagnostics-H (OBD) dongles and setting up to TFM platform that seamlessly connects pickup, delivery, and driver hours with back-office functions. A mobile application provides drivers with step-by-step instructions on assignments.

> spell out - Fleet Monetoring Cloud Service With Oracle Internet of Things Fleet Monitoring Application, ChocoTime Inc. has identified significant improvements over the last few months

What Do You Need? ✓

- Access to an Oracle IoT Fleet Monitoring Cloud Service instance The URL, user name, and password are in the email that you received when you purchased your subscription to Oracle IoT Fleet Monitoring Cloud Service.)
- A desktop, laptop, or mobile device with internet connection
- Familiarity with transportation and logistics processes

Configuring the Application Monetary and Vehicle Information

In this section, you learn how to configure monetary and vehicle units, and also how to upload commaseparated value (CSV) vehicles and trip templates data to Oracle IoT Fleet Monitoring Cloud Service.

1. In a web browser, enter the URL of your Oracle IoT Fleet Monitoring Cloud Service instance and log in with your credentials. The home page appears?

Suggested Replacement for Step 4 in the Configuring Monetary and Vehicle Information Section

Adding Data About a Vehicle to the CSV File

- 1. On the Configuration page, click Upload.
- 2. On the Configuration: CSV Data page, right-click the vehicle-import.csv file.
- 3. Select **Save link as,** and save the file to your computer.

Note: To see the formatting of the CSV data, click Download a Sample CSV file, and save the file to your computer.

Uploading the CSV File

After you add the data about a vehicle to the CSV file:

- 1. On the Configuration page, click Upload.
- 2. For the vehicle, click Upload New.
- 3. Find the vehicle-import.csv file, and select it.

Adding Data to a Vehicle Trip Template File

- 1. On the Configuration page, click Upload.
- 2. On the Configuration: CSV Data page, right-click the tripTemplate-import.csv file.
- 3. Select Save link as, and save the file to your computer.

Uploading the Trip Template File

After you add the data to the trip template file:

- 1. On the Configuration page, click Upload.
- 2. For the trip template, click Upload New.
- 3. Find the tripTemplate-import.csv file, and select it.
